

Dear Avis Ignis USA, LLC.,

Dist-Trans Co. wanted to thank you for all your hard work with the implementation and training of the PhoenixEM Fuel Management System at our campus located at 1580 Williams Road, Columbus, OH 43207.

We had Gasboy as our provider previously and your system is far beyond the capabilities we experienced with them. Reports now are visible via the server on anyone's computer in comparison to the one computer system we had before.

The drivers' overall impression is that the system is very simple to use at the pump even though it asks for more credentials than the Gasboy used to and the planning for fuel purchase is made easier with the real time data we are receiving every 60 seconds. Our goal is to be able to reduce our fuel purchase from every day to twice week.

We highly recommend Avis Ignis USA, LLC. as a partner for companies who manage their own fuel with a fuel tank on their property and especially when they manage a fleet with potentially more sites.

Again thank you and let us know if we can help in any way with your marketing efforts in the region by being available for references to any new potential client you might work with in the future.

Sincerely,

A handwritten signature in black ink that reads 'Paul Reif'.

Paul Reif
